

## Jump Into A New Season

When your saddle has been created uniquely for you and your horse and you know that every detail has been carefully considered to offer optimum performance, only then can you begin to understand why so many top professional riders choose to ride in **Childéric Saddles**.

Having confidence in your equipment especially at top level competition is imperative, and the **Childéric CFSC Jump Saddle** is a model which has been designed for the showjumper who demands perfection and performance.

Incorporating Childéric's unique tree technology, which allows the horse greater freedom of movement, thanks to its anatomically shaped panels and carefully positioned points. The further set back points coupled with the tree work together to allow the horse to move through its shoulder to ensure that the horse's stride is never compromised in-between or over jumps.

Because the saddles are fitted to both the horse and rider and incorporate Childéric's 'Perfect Balance Philosophy' the rider is always in perfect balance and placed in the middle of the horse. This allows the rider the luxury of being able to adopt a variety of positions with ease: From speed on the flat in a forward seat through to a secure position on landing after fences. Additional bespoke options can also be added with a variety of different girth strap positions, refined flap and panel shapes without pressure points, a range of knee block options, seat depths, sizes and leather covering at additional cost.

***Continued...***
